

C&W Tank Cleaning

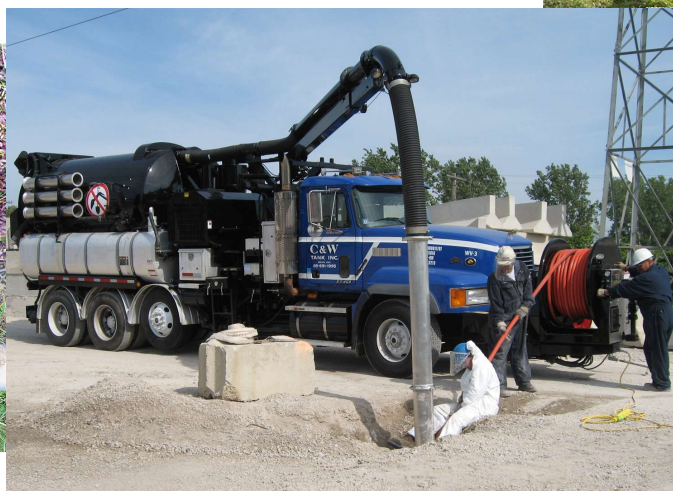

Hydro Excavation

Hydro excavation, or soft digging, is a non-invasive way of locating underground utilities without the dangers of historical excavation with a backhoe or track hoe. Sediment is removed with low pressure water or air and vacuumed from the excavation to locate unknowns underground.

C & W technicians can perform:

- Potholing
- Trenching
- Soil/sediment removal around structural foundations
- Daylighting underground utilities

Call C & W Tank Cleaning today for your Hydro Excavation needs!
